Karachi, Pakistan

PROFILE

Full stack AI Engineer with 1+ year of experience in Generative AI, Machine Learning, DeepLearning, Computer vision and Automations. Proven track record of delivering production-ready AI solutions.

EDUCATION

Bachelor of Science in Artificial Intelligence Nov 2022 – 2026
Dawood University of Engineering & Technology Karachi, Pakistan
CGPA: 3.74 / 4.0
HEC Scholarship: 4-Year Merit Scholarship awarded by the Higher Education Commission of Pakistan

MERN Stack Development 2023 – 2024
Saylani Mass IT Training (SMIT) Karachi, Pakistan

EXPERIENCE

Full Stack AI Engineer Mar 2026 – Present
Phoenix Technologies Karachi, Pakistan

- Architected and deployed end-to-end AI solutions, including LLM chatbots, content generation, and workflow automation, integrating OpenAI and Anthropic Claude through optimized prompt pipelines while owning full-stack development, database architecture, cloud deployment, and CI/CD to deliver accurate, reliable, and low-latency AI products.

Data Science Intern April 2026 – June 2026
10Pearls Shine Program Karachi, Pakistan

- Selected for the competitive 10Pearls Shine Data Science Internship, where I developed and deployed an end-to-end AQI prediction pipeline covering data ingestion, cleaning, validation, feature engineering, model training, and Hopworks-based feature management, complemented by weekly mentorship, technical assessments, and a live capstone application.

Generative AI Intern Oct 2024 – Jan 2025
OneStop Vendors Karachi, Pakistan

- Developed and deployed Generative AI solutions including an AI voice bot for Ufone franchise call automation and an intelligent sales bot for customer inquiries and service promotion, collaborating cross-functionally from solution design and training through production deployment.

PROJECTS

FYP: A Deep Learning Based Virtual Try-On System for Clothing | Deep Learning, Computer Vision, NLP FYP — 2026

- Developed a deep learning-based virtual try-on system using computer vision and image synthesis to visualize clothing on user images, enhanced with an outfit recommendation module based on user attributes and an AI-powered chatbot for interactive styling assistance.

Shipping Management System | Python, Supabase, CI/CD 2026

- Built a full-stack shipping and logistics platform with automated invoice, quotation, and bill of lading generation, live document previews, Supabase-backed data persistence, integrated profit/loss tracking across financial and shipment modules with audit logging, and CI/CD for automated deployment.

SKILLS

AI & ML: DL, NLP, CV, LangChain, LangGraph, RAG, Prompt Engineering, LLM APIs (OpenAI, Anthropic Claude)
Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, FastAPI, Flask, Keras, OpenCV, Pandas / NumPy, Streamlit
Tools & Platforms: Docker, Git, CI/CD, Pinecone, Qdrant, pgvector, MERN Stack, Python
Web Development: React, Node.js, JavaScript, REST APIs
Databases: MongoDB, PostgreSQL, Supabase, Firebase

CERTIFICATIONS

Google Prompting Essentials Specialization — Coursera 2026
Google AI Professional Certificate — Coursera 2026
Generative AI Application Developer — Pak Angels 2025
Career Essentials in Generative AI — Microsoft & LinkedIn 2024
Google AI Essentials — Coursera 2024
Python for Data Science, AI & Development — Coursera 2023
